

ComEd Retro-Commissioning Request for Proposal (RFP)

Overview

The ComEd Energy Efficiency Program is seeking qualified engineering firms to participate in our closed network of Service Providers for their Retro-Commissioning (RCx) Offering. Our Service Providers are tasked with bringing this valuable offering to eligible facilities over 50,000 sq.ft. in size and between 100 kW and 10,000 kW peak demand. Facility types include commercial office, healthcare, retail, hospitality, lodging and public buildings. Service Providers are paid for RCx studies of these facilities, with the ultimate goal being customer implemented measures that create cost-effective energy savings.

Eligibility

Not sure if your company would qualify for our closed network of Service Providers? Refer to this checklist for basic eligibility requirements:

- Do you have expertise in RCx?*
- Can you provide samples of thorough RCx reports and calculations from recent successful projects?
- Will you have dedicated resources for business development in the ComEd territory?
- Is your company in good standing with the Better Business Bureau (BBB)?

If interested in receiving the ComEd RCx RFP or if you have any questions regarding the RCx Offering, please email us at rcxrfp@nexant.com with your company's contact information and interest level.

The RFP will be released in Tuesday, June 1, 2021.

*RCx defined as building assessments/studies which result in the implementation of no-cost and low-cost operational measures such as scheduling equipment, optimization of economizer and outdoor air controls, chilled water temperature resets, etc., ultimately creating annual energy savings and reduced peak demand.
